Aromatic halogen compounds pdf file format download

These are often covered in the chapter on amines, but they're going in here regardless because they certainly can come in handy. After studying this, you can Quiz Yourself! (Not included are the Heck, Suzuki and other cross-coupling reactions, which you can read about here.) File: (PNG) Alternatively: (PDF) The map also makes reference to a previous sheet on alkyl halides: Synthesis (3): Reactions of Alkyl Halides The previous post in this series of Reaction Maps, on alcohols: Synthesis (6): Reactions of Alcohols Questions, comments, suggestions - I'm all ears, leave a comment. Quiz Yourself! Click to Flip Click to Flip Click to Flip Click to Flip Click to Flip Home / Synthesis (7): Reaction Map of Benzene and Related Aromatic Compounds By James Ashenurst Last updated: February 4th, 2021 | Reactions of Benzene and Aromatic Compounds: A Reaction Map (PDF) Let's map out all of the reactions we've learned in this section on aromatic rings + substituents. The list comes to about 25, including the six key electrophilic aromatic substitution reactions, the Wolff-Kishner and Clemmensen reductions of ketones, reduction of nitro groups, the Baeyer-Villiger oxidation, and protection of amines. Side chain oxidation, desulfonylation. Also included is a few reactions we actually haven't covered yet - such as diazonium salt formation and Sandmeyer reactions.
